ABOUT THE TRACK

At its heart, Cool to Love is a call to bring back old-school, genuine, unapologetic love - romance expressed with confidence, intention, and no fear of being sincere. The contemporary R&B/Soul track pairs that timeless message with a relaxed 80 BPM pocket, warm Rhodes textures, supple bass, polished rhythm, and an intimate male vocal.

Its smooth, grown-up groove leaves space for dialogue and visual storytelling, while the memorable title hook provides a clear emotional payoff. It can underscore flirtation, date-night, fashion, hospitality, and relationship-driven scenes, then rise naturally into a feel-good featured moment with warmth, style, and editorial flexibility.
